

Foundations

(applicable to AquaLogic Interaction 6.x or Plumtree 5.0 audiences)

Duration

1 day

Description

This course introduces the AquaLogic User Interaction (formerly Plumtree) family of products and covers how each product contributes to creating rich applications and web sites within a portal implementation. Students learn about the products: AquaLogic Interaction (the portal), Collaboration, Publisher, Studio, and Analytics by using each of them in the lab exercises. We also cover the basic aspects of security from an end user's point of view. The Foundations course also describes the various roles that people play and helps people understand how they fit into the implementation and what they should do next. Finally, we provide a proven roadmap for success, which is based on Consulting best practices. This is a great starter course for everyone who will be involved in the portal implementation.

Target Audience

- Portal Managers, Administrators
- Business Analysts
- Project Managers
- Content Managers
- Community Managers
- End Users

After this course, participants will be able to:

- Use basic features of the portal (navigate, customize, search for content, people and other items)
- Perform basic user tasks in Collaboration
- Use a typical Publisher portlet to add content to the portal
- Work with the Studio poll portlet
- Explain why users have different experiences with the portal (i.e., witness secured access control)
- Describe the different types of people that are involved in the implementation team

This course is appropriate for people using either version 5.0 or 6.0 of the portal (AquaLogic Interaction). Do not attend this class if you have attended Foundations within the last two years, unless you'd like to attend as a refresher.

Prerequisites

- Ability to navigate in Windows
- Proficiency using an Internet browser
