After taking **BEA AquaLogic® Business Process Management (ALBPM): Essential Concepts**, students will have the skills to:

- Discuss how business process management (BPM) can help a business define and optimize its business processes
- Identify business process management team members and describe what each does
- Describe how a business process model is designed, built, tested, implemented, deployed, run, and monitored using the BEA AquaLogic Business Process Management product suite

### Course highlights

This interactive online course offers a quick overview of Business Process Management and the BEA AquaLogic BPM product suite. The course enables students to communicate about business process management and BEA AquaLogic Business Process Management and evaluate the product for use in their company, but the course does not teach students how to use the product.
